

You can find our new image bank here: www.guidecraftblog.com/images or by clicking on the red “Retailer Resources” button on the top navigation of our website at www.guidecraft.com

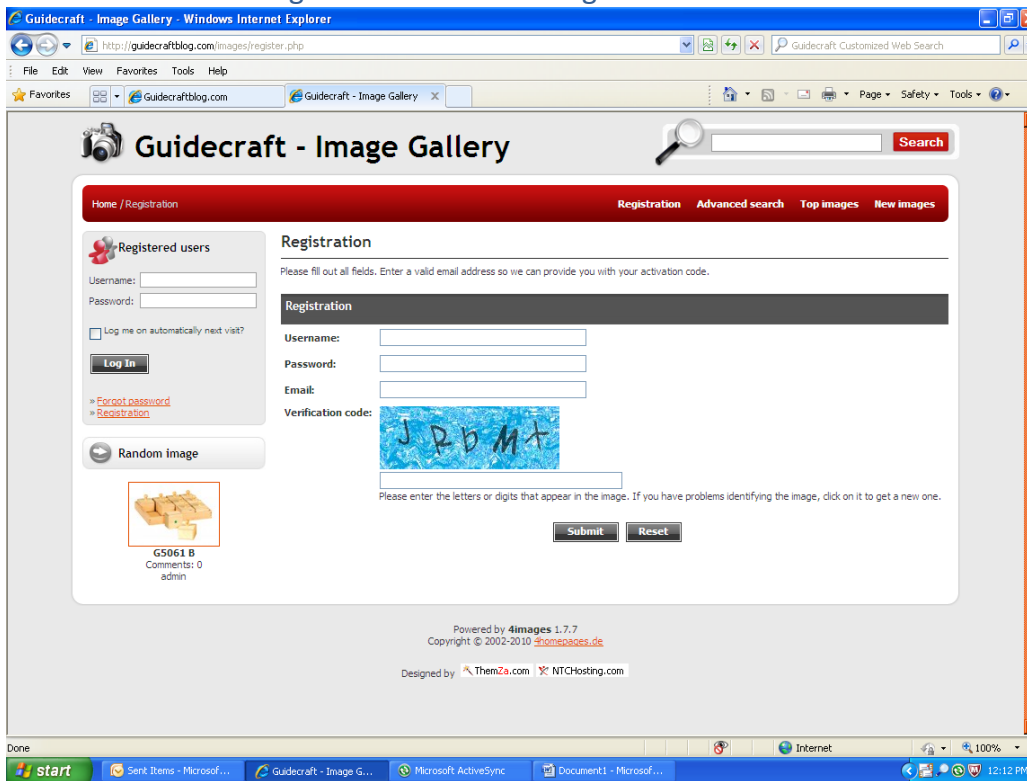

Once you are at the new database you will see the following screen

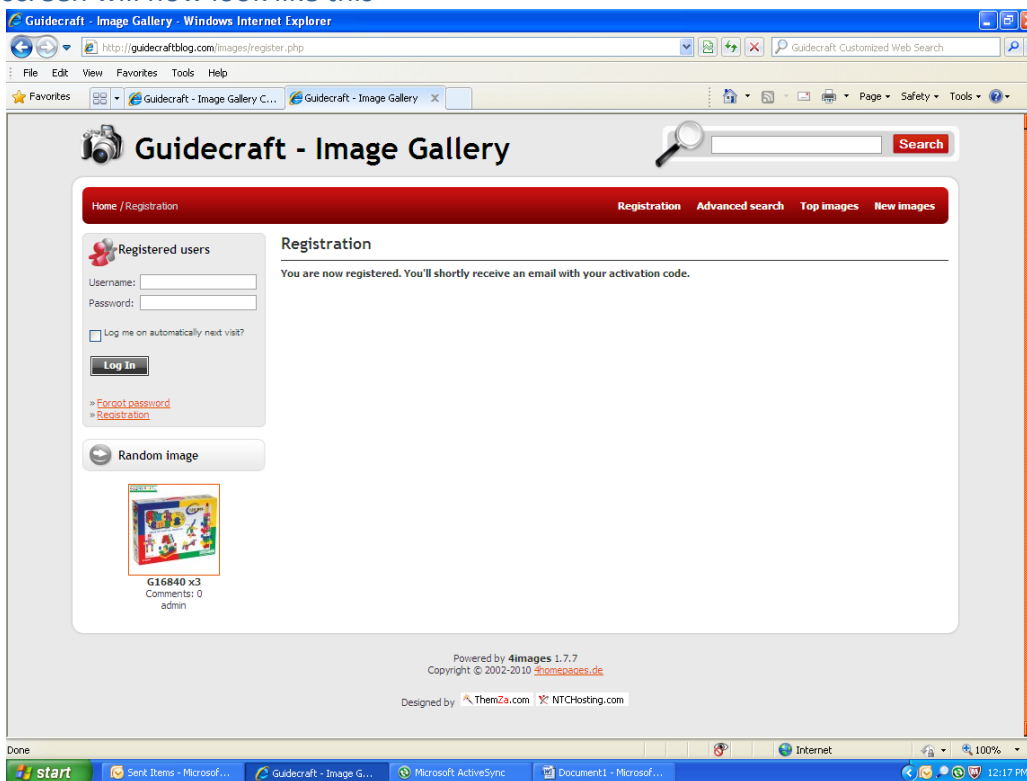

First you will need to click on “Registration” on the left side of the page. Once there your screen will look like this.

Read the “terms of Registration” and click “agree” to continue. Your screen will now look like this.

Enter your own username, password and email then enter the verification code and click “submit”. Your screen will now look like this

Now check your email and follow the link provided to activate and access your account.

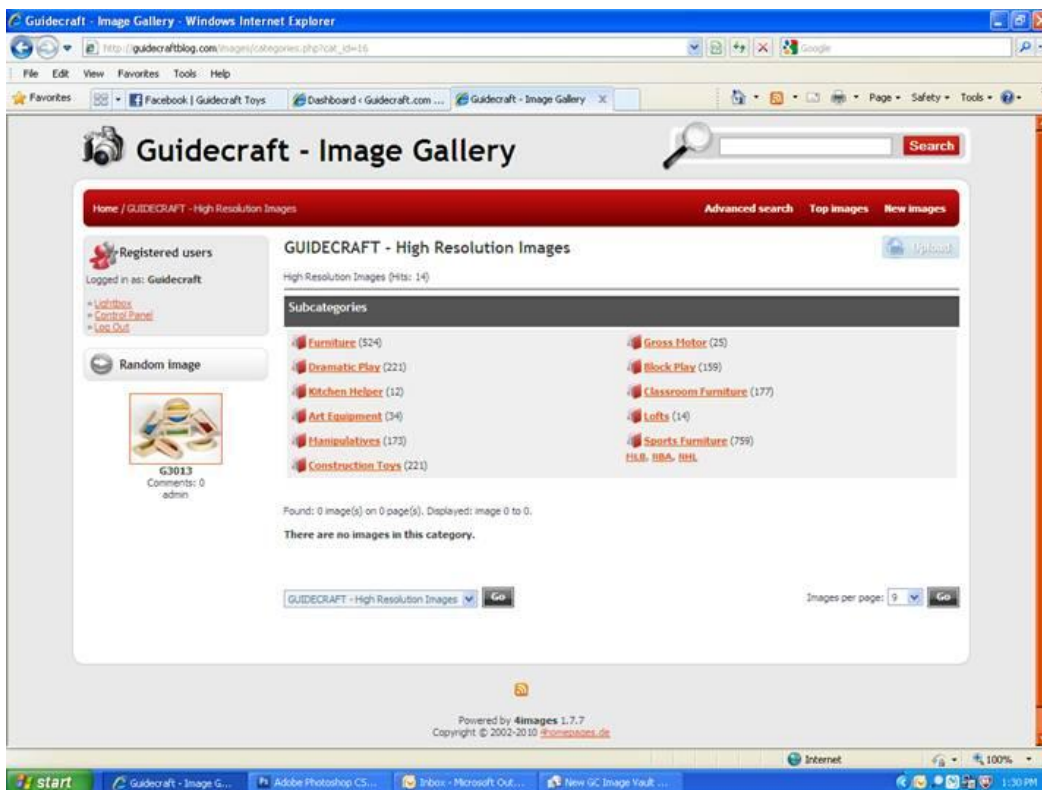

Your screen will look like this. Now you may log-in using the username and password that you created.

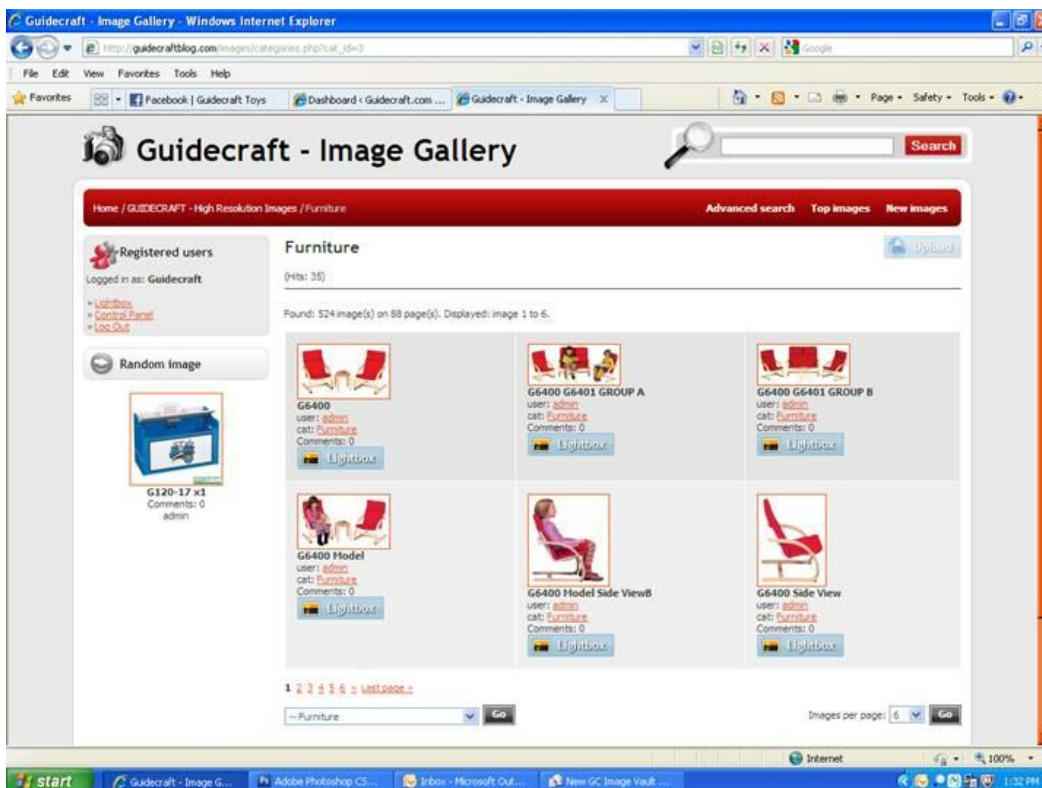

Using the Drop-down box under the red bar at the top you can select a product category. OR, you can select the same under the “Categories” section. Either way will allow you to quickly jump to the High Res or Low Res Images defined by category. Notice also at the top right of the page you can select from the drop-down how many images you want to display on the page at one time.

Here, I've clicked on "GUIDECRAFT High Resolution Images" in the "categories" area.

Here, I've clicked on "Furniture" and have 6 images displayed on the page as per my choosing.

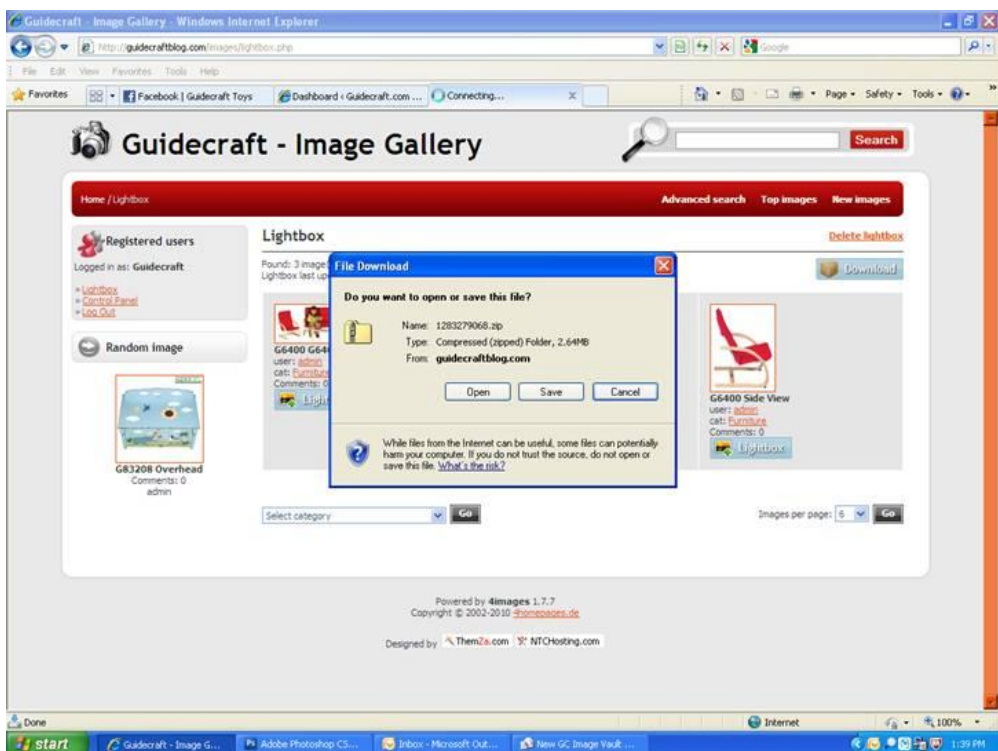

Directly below each image you will see an area called "Lightbox" if you click on it you will see a green "+" appear. This signifies that you just added this image to your lightbox for eventual download.

Once you have selected all of the images (both high and low resolution) that you require, click on the hyperlink **“Lightbox”** on the left side of the page (under in the **“Registered Users”** area).

From this screen you can download your entire lightbox to your computer in a zip file. Simply click on the **“Download”** button in the top right hand corner directly above your selected images. Notice also there is a **“delete lightbox”** that will of course remove all items from your lightbox once clicked. Once you click on the **“download”** button, a file download pop-up box appears with your zip file information in it. Here is where you will determine if you want to Open, Save, or Cancel this download. Save the file to your computer then unzip the file and access all of your chosen images.

Once you have downloaded all of your images, you can “delete” the lightbox to clear it out and close the window or log-out.

Also, if you are having trouble finding an image or not sure of its category, you can always use the “**Search**” feature located at the top right hand corner of each page or the “**Advanced Search**” feature located in the red bar across the page.
